

Connected Teams

Intentional spaces for deeper connections

90-Minute Connected Teams Session

Are you meeting with your team or other groups of people in your business as often as you did pre-pandemic? If not, you're likely to be missing out on a vital part of your business life: **being connected, having a sense of belonging and feeling seen, heard and valued.**

Connected Teams is designed to get you and your team or working group (re)connected. Each and every facet, from the purpose of your session to ensuring each person has their say, has been carefully designed to **create space for meaningful connections to occur.**

- Build psychological safety and trust in one another and foster a sense of inclusion and belonging
- Tap into your team's collective wisdom, insight and knowledge to collaborate on current challenges or opportunities
- Bring your team together to use as a sounding board for fresh new ideas, approaches and innovative ways forward

How does Connected Teams Work?

What's Your Purpose? We first meet for a Consultation to agree your purpose and a theme (we call this a Mission) and to secure a date for your Session.

We then **design your Mission** providing each team/group member with guidelines on how to make the best of their time.

Your Session: We meet for 90-minutes over Zoom where each member of your team/group will have the opportunity to contribute to the Mission.

Team/group members will have the space to **give one another feedback** and offer their insight, wisdom and ideas.

After your session, you'll be invited to join a Private Channel to **stay connected**, continue to share ideas and collaborate.

Ready to book this Session for your team or organisation?
